

[Claim]

[Claim 1] An external preparation for athlete's foot treatment, comprising an anti-trichophyton drug mixed with at least one compound selected from 1-menthol, menthol analogue compounds and bactericidal compounds.

[Claim 2] The external preparation for athlete's foot treatment, wherein the anti-trichophyton drug and at least one compound selected from 1-menthol, menthol analogue compounds and bactericidal compounds are blended in 0.1-10% by mass and 0.5-5% by mass respectively.

[Claim 3] The external preparation for athlete's foot treatment according to claim 1 or 2, wherein the menthol analogue compound is 3-1-menthoxypropane-1,2-diol.

[Claim 4] The external preparation for athlete's foot treatment according to any one of claims 1-3, wherein the bactericidal compound is isopropylmethylphenol.

[Claim 5] The external preparation for athlete's foot treatment according to any one of claims 1-4, wherein the anti-trichophyton drug is selected from benzylamine type, allylamine type, thiocarbamic acid type and imidazole type antifungal agents.

[Claim 6] The external preparation for athlete's foot treatment according to any one of claims 1-5, wherein the anti-trichophyton drug is one kind selected from butenafine hydrochloride, terbinafine hydrochloride, tolnaftate, bifonazole, ketoconazole, neticonazole hydrochloride and lanoconazole.

[Claim 7] The external preparation for athlete's foot treatment

according to any one of claims 1-6, wherein the anti-trichophyton drug and 1-menthol are blended.

[Claim 8] The external preparation for athlete's foot treatment, wherein butenafine hydrochloride, 1-menthol and isopropylmethylphenol are blended.

[Claim 9] The external preparation for athlete's foot treatment according to any one of claims 1-8, also comprising at least one kind of a local anesthetic, an antihistamine and an anti-inflammatory drug.

[Claim 10] The external preparation for athlete's foot treatment according to claim 9, wherein the local anesthetic is dibucaine hydrochloride, or lidocaine or its salt.

[Claim 11] The external preparation for athlete's foot treatment according to claims 9 or 10, wherein the antihistamine is chlorpheniramine maleate, or diphenhydramine or its salt.

[Claim 12] The external preparation for athlete's foot treatment according to any one of claims 9-11, wherein the anti-inflammatory drug is glycyrrhetinic acid or its salt, or allantoin.

[Claim 13] The external preparation for athlete's foot treatment, wherein butenafine hydrochloride, 1-menthol, dibucaine hydrochloride, chlorpheniramine maleate and glycyrrhetinic acid are blended.
